Education and Language, 343 - 374.

Fall, The, of England! The Battle of Dorking, critical notice of, 473 - 476.

French and German Diplomacy after Sadowa, article on, 374 - 414 — French hostility to Prussia, 374 — object of treaties of 1815, 375 — Napoleon III.'s impatience with them, 375 — his glorification of his Constitution in January, 1866, 376 — note of February 1st reviving 42d article, in regard to publishing legislative debates, 377 — discussion in French Chambers on conflict between Prussia and Austria, 378 — why Napoleon did not object to Italy's alliance with Prussia, 379 — interviews at Biarritz between him and Bismarck, 379 — fatal weakness of French diplomacy, 380 — Napoleon's needless proclamation of his purposes, 380 — famous letter of June 11, 381 - 383 — terms of treaty after Austrian overthrow, 381, 382 — dismissal of Drouyn de l'Huys, 383 — Prussia's absorption of small German States, 384 — easy and swift success of Bismarck in producing North German Confederation, 386 — King William's address to the New Parliament, 386, 387 — Napoleon's blunder in believing a South German Confederation would be formed hostile to the Northern, 388 — course of Bavaria under Prince Hohenlohe, 389 - 391 — France aware of Germany's union and power, 392 — M. LaValette's circular of 16th September, 393 — the fatal hint in it, 394 — Prussia's reasoning and action on it, 395 — conclusion of the Military Commission published December 12, 396 — popular opposition to it, 396 — ill success of Emperor's Constitutional changes in 1867, 397 — discussion in the Corps Legislatif, 398 - 402 — speech and programme of Thiers, 399 — of Garnier-Pagès, Ollivier, and Count Latour, 400 — of Rouher, 401 — of Jules Favre and Granier de Cassagnac, 402 — publication of treaty between North and South Germany, 403 — Bismarck's diplomacy in securing the alliance of the Southern States, 404 — the Luxembourg question, 406 - 414 — political history of the Grand Duchy, 406, 407 — proposed sale of it to the Emperor by the King of Holland, and its defeat, 408 — Napoleon's demand that Prussia evacuate the fortress, and Bismarck's reply, 409 — Germany's indignation at prospect of losing Luxembourg, 410 — general eagerness for war, 411 — Von Beust's proposal, 412 — the London Conference, 412, 413 — victory of Prussia and defeat of France on every point, 413, 414.

Genesis of Species, 63 - 103.

Greene, G.W., his Life of Nathanael Greene, critical notice of, 441 - 449.

Heard, Franklin Fiske, his Curiosities of the Law Reporters, critical notice of, 219 - 221.

Hague, James, his Mining Industry, critical notice of, 303 - 310.

Herschel on origin of mountains, 265-268.
Italy, the Regeneration of, article on, 274-321 — importance of Italy in the world's culture, 274 — loss of Italian prestige, 275 — three things necessary to be done for Italy in 1821, 276 — Dante's annunciation of the national idea, 277 — political influence of the guilds, 279 — *camorra* in Naples, 280 — object and character of the Carbonari, 280-284 — accession of Pius IX. as a Liberal, 285 — his change of front, 286 — assassination of Rossi, 287 — want of statesmanship among the Liberals, 288 — Charles Albert's defeat at Novara, 289 — Roman Republic crushed by French Republican bayonets, 291 — Gioberti's conceit of "Italian primacy," 292 — Cavour's appearance as a power in Italian politics, 293 — Napoleon's singular aid of Italy against Austria in 1859, 293 — follies of the republican party after Villafranca, 294, 295 — causes of second French intervention, and battle of Mentana, 296 — art of political demonstration in Rome and Venice, 297 — degradation of Italian politics in 1869, 298 — opposition to bill for stopping brigandage, 299 — need of a strong, reasonable opposition party, 301 — spirit of Italian laws is the spirit of liberty, 302 — freedom of forests, 302 — of elections, 303 — tendency to decentralization, 304 — civil service in poor working order, 305 — freedom of press, 305 — of professions and industries, 306 — Italian conservatism in social economy, 306 — few *Instituti di Credito*, 307 — Italian dislike of laws and regulations, 308 — opposition to the Catholic religion, 309 — different classes of religionists, 310 effect of education on Italians, 312-315 — honesty of upper classes, 314 — what Italians have gained from foreign guests, 316 — Italian temperament, 316 — willingness to confess errors and defeat, 317 — effects of physical geography of countries, 317-320 — on Italy, 317 — apparently not on Corsica and Sardinia, 318, 319.
King, Clarence, his United States Geological Exploration of the Fortieth Parallel, and his Contributions to Hague's Mining Industry, critical notice of, 203-210.
Language and Education, article on, 343-374 — serious defects in schools and school systems of United States, 344 — imperfect character of our colleges and universities, 345 — modification in English educational system inevitable by reason of modern science, 346 — what constitutes an educated man, 347 — one cannot acquire universal knowledge, 348 — obstacles to exclusive devotion to self-improvement, 349 — general and special culture, 350 — relation of discipline to culture, 351 — courses of study hit-or-miss affairs, 352 — necessity that the pupil be taken into the counsels of his instructors, 353 — folly and wastefulness of spending time in intellectual gymnastics, 354 — value of "barren facts," 355-357 — acquisition of language the first step in education, 357 — how language is developed, 358 — difference between language as an endowment of nature, and as a developed product of this endowment, 359 — important part played by language in development of individuals, 359 — one language naturally as extraneous to our mental acts as another, 360 — Greek culture derived no aid from linguistic study, 361 — negative inferences from this fact, 362 — reasons why we may not imitate it, 363 — important uses of philology, 363-365 — knowledge of French and German an indispensable part of a disciplinary education, 365 — value of other languages, — Sanskrit, 366 — other Oriental languages, 367 — Greek and Latin, 368 — thoroughness of study devoted to these two, 369 — high popular estimate of classical scholarship, 370 — diminution of relative importance of Greek and Latin as disciplinary studies, 370 — spirit of criticism prevalent in modern philology, 371 — in strict accordance with spirit of modern science, 372 — science and philology supplementary, not hostile, to each other, 373 — diversities of taste and opinion must be allowed for in systems of study, 374.
Larned, J. N., on commerce between United States and Canada, 124.
Liebig on use of sulphuric acid as a test of national prosperity, 124.
Minority Representation, Forms of, article on, 1-29 — failure of the district system, and its causes, 1-3 — three plans for securing minority representation, 3 — the limited vote, its partial success in United States, 4 — its failure in "three-cornered" constituencies in England, 4-6 — its chances for failure in the free list, as at Geneva, 6-9 — the cumulative vote, its operation in electing school boards in England under the Education Act, 9-15 — hypothetical illustrations of the possible injustice and wastefulness of the system, 15-18 — the single vote, Mr. Hare's system, 18-25 — its successful application in election of Overseers of Harvard College in 1870, 20 — Mr. Ware's summary of its advantages, 21, 22 — objections to it, — lack of simplicity, 22, 23 — furnishes opportunities for fraud, 24 — difficulty of filling vacancies by any of these three systems, 25-27 — reform in party management needed more than any scheme for minority representation, 29.
Müller, F. Max, his Translation of the Rig-Veda-Sanhita, critical notice of, 174-187 — critical notice of his Lectures on the Science of Language, 430-441.
Mundella, A. J., on comparative cost of

hosiery in United States and England, 128.

New York, The Misgovernment of, — a Remedy suggested, article on, 321-343 — aptitude of Irish emigrants for misgoverning cities, 321, 322 — differences between conditions of city and country, 323 — between different classes, 323, 324 — Mill's test of political institutions, whether they train the people, 324 — evil features and effects of the charter of New York next preceding that of 1870, 325-327 — folly of obliging people to decide by ballot upon the fitness for office of a great number of persons, 327, 328 — bad results in States and in New York City, 328-332 — devices and vicious safeguards of the new charter, 332-334 — law-abiding character of great majority of poorer classes in New York, 336 — form of constitution which has given most satisfaction, 337 — proposed government for New York, 337-341 — its probable effect, 341-343.

Palestine, The Exploration of, article on, 154-173 — description of Jerusalem by Josephus, and points established thereby, 155, 156 — problems requiring solution, as stated in "Palestine Exploration Fund," 158 — origin and object of this "Fund," 159 — discovery of arches, etc., by it, 159-162 — obstacles to exploration, 164 — imperfections of Capt. Warren's narrative, 165 — Capt. Wilson's description of Sea of Galilee, 167 — value of Lieut. Anderson's monograph on the Survey of Palestine, 168 — egotism of F. W. Holland's paper on explorations in the Wilderness of Sinai, 169 — results of exploration in Moab, 171 — rich field for future explorations, 172, 173.

Religion of Ancient Romans, 30-62.

Revenue Reform, The Meaning of, article on, 104-153 — President Grant's perplexity about it, 104 — Gens. Butler and Schenck's joy that his message had killed it, 104 — general statement of what it means and implies, 105 — justification of revenue reformers in having at present no definite financial system, 106 — leading features of our financial and industrial history from 1857 to 1871, 106-113 — large production and general prosperity in 1859-1861, 108-110 — large exports in 1864-65, 111 — great reduction after war, 112 — circumstances facilitating return of soldiers to productive pursuits, 113 — resources of the nation, 113 — present unsatisfactory condition of its industries and laboring classes, 115 — complacent opinions of President, and Secretary Boutwell, 116 — ugly statistics, 117-131 — *per capita* consumption of sugar and coffee less in 1869 than in 1859, 117 — increase of business failures, 118 — unsatisfactory exhibit of foreign commerce in 1870, 119 — foreign balance against us, 120 — unnatural condition of trade between Argentine Republic and United States, 121-123 — tables of exports of domestic produce and imports between United States and several foreign countries in 1860 and in 1869, 123, 124 — table of exports of various domestic products in 1860 and 1869, 125 — great diminution of United States tonnage from 1860 to 1870, 126 — increased cost of making boots and shoes, 127 — hosiery, 128 — destruction of shipbuilding interest, 129, 130 — comparative indebtedness and expenditures of Great Britain and United States, 131 — wretched method of levying and collecting United States taxes, 132-148 — due partly to ignorance and incompetency of financial managers, 132 — views of Secretary Boutwell, Senator Sherman, and President Grant, 132 — the way American industry is protected, 133-145 — cost and consumption of sulphuric acid, 134 — Senator Morrill's objection to removing duty on sulphur, 135 — reason for the relatively great cost of hats, 135-137 — of edge-tools, 137-139 — protection of quinine, 139 — wood-screws, 140 — lasting, serge, and morocco, 141-143 — marble, 143-145 — impolicy and great cost of reducing national debt by a tariff, 146-148 — modes in which one fiscal abuse fosters others, 148, 149 — necessity of immediate reform based on intelligent comprehension of industrial and financial principles, 149-153.

Romans, the Ancient, The Religion of, article on, 30-62 — confusion of Greek and Roman mythology, 30 — Roman poets give us Greek mythology, 31 — sources of information respecting Roman religion, 31-33 — multitudinousness of Roman pantheon, 34 — worship of abstract qualities, 35 — slight worship of elementary spirits, 35 — lack of demi-gods and heroes, 36 — excessive formality, 37 — fetich worship, 38 — serpent worship, 39 — *fauni* and *silvani*, 39 — mysteries, 40 — Dii Consentes and Dii Involuti, 41 — Penates and Dii Indigetes, 42 — Novensiles, 43 — modes of seeking the will of the gods, 43, 44 — special objects of Roman worship, 45-47 — gods with flamens, 45 — first great triumvirate, Jupiter, Mars, Quirinus, 46, 47 — changes produced by Italian influence, 47-50 — Capitoline trio — Jupiter, Juno, and Minerva — under the Tarquinian dynasty, 47 — Diana, 48 — Juno Sospita Mater Regina, 48 — Soranus and Feronia, 49 — primitive rites of Romans connected with their character as a farming people, 50 — changes effected by Greek influence, 50-56 — gods and goddesses borrowed from Greece, 51 — Ceres, 51 — Sibylline books, 52 — baleful influence following second Punic War, 52 — changes of religion produced by vast growth of Rome, 53, 54 — systems of

philosophy, 55 — decline of the established religion, 55 — reaction under Augustus, 56 — Oriental influence, 56 - 60 — resemblance of the festival of the Great Mother to Easter, 57, 58 — similar significance of the Egyptian religion of Isis, 58 — essential difference between polytheism and monotheism, 58, 59 — symbolism of the myth of Isis and Osiris, 59 — introduction of Asiatic superstitions during the dynasty of the Severi, 60 — worship of the Emperor, its analogy to the veneration for the Pope, 60, 61.

Shurtleff, Nathaniel B., his Topographical and Historical Description of Boston, critical notice of, 221, 222.

Species, The Genesis of, article on, 63 - 103 — doctrine of evolution accepted by many orthodox students of science, 64 — Mivart's criticism of Darwin's theory of natural selection, 66 - 102 — specific genesis, 66 — accidental changes, 68 — natural selection, one of numerous modifying causes, 69 — analogy of specific forms in organisms to those in crystals, 70 - 72 — Newton's and Darwin's respect for the rigorous rules of experimental philosophy, 72, 73 — study of natural selection somewhat like that of political economy, 74 — Darwin's modification of Darwinism, 75 — Mivart's misunderstanding and misinterpretation of Darwin, 76 - 84 — use of the giraffe's neck, 86 - 88 — protective resemblances in the Borneo leaf-butterfly, 90 - 92 — supposed origin of milk-glands, 92 — æsthetic tastes of female apes, 93 — rattling and expanding powers of poisonous snakes, 94 — theory of natural selection illustrated by what Jesus said to Nicodemus, 96 — by the growth of trees, 98 — Mivart's criticism of Darwin's theory of Pangenesis, 100 - 102.

Volcanism and Mountain-Building, article on, 235 - 274 — geological and geographical significance of mountains, 236 — close relation between elevation of mountains and formation of continents, 237 — Humboldt's statement of the cause of volcanic phenomena, 238 — nature and condition of the interior of the globe, 240 — volcanoes and earthquakes caused by internal heat, 241 — earthquakes easily explained, 242 — volcanoes more complicated, 243 — Richthofen's researches and great work, 243 — extent and manner of former volcanic action, 244 — distinction between massive and volcanic eruptions, 245 — character of volcanic rocks, 246 — granite and porphyry, 248 — mineralogical composition of eruptive rocks, their similarity all over the world, 249 — their order of succession, 250 — difference between granite and ordinary volcanic rocks, 252 — nature of the force which brings the material of the molten interior to the surface, 253 — theory of Forbes, Scrope, Phillips, and Bischof, that steam is the *primum mobile* of volcanic eruptions, 254 — objections to it, 255 — forces that have produced mountains, 256 — Dana's theory, 257 — our ignorance of the structure of most mountains, 258 — different classes of mountains, 259 — early blocking-out and slow development of the great mountain chains, 260 — De Beaumont's system and its poor correspondence with fact, 261 — eruptive rocks form part of all great mountain chains, 262 - 264 — H. D. Rogers's fantastic theory of mountain upheavals, 264 — Professor Hall's theory, its untenableness, 265 - 269 — origin of sedimentary formations, 269 — growth of mountains, — the Cordilleras, 270, 271 — Appalachians, 272 — causes of plication of strata, 272, 273.

Vose on origin of mountains, 265 - 268.

White, John, his Sketches from America, critical notice of, 228 - 234.

Yeaman, George H., his The Study of Government, critical notice of, 197 - 203.

Cambridge: Printed by Welch, Bigelow, and Company.
